

- **Tantalum Solid Functional Polymer Chip**
- **35% to 50% Lower ESR Than Manganese Type**
- **Lead-Free Construction**
- **+105°C Maximum Temperature**

The PT series is a tantalum electrolytic chip capacitor series that is designed with a solid functional polymer as the electrolyte and constructed of lead-free non-combustible materials. These PT chips offer 35% to 50% lower ESR and higher ripple current capability than the manganese oxide types. The PT chips have a wide operating temperature range of -55°C to $+105^{\circ}\text{C}$ and provide stable electrical parameters and high reliability over a rated life of 1,000 hours at $+105^{\circ}\text{C}$. The PT chips can withstand high temperature lead-free alloy melting points over 230°C for 40 seconds max. during reflow soldering. Target applications include DC-DC converters, voltage regulators and decoupling applications where low ESR at high frequency is required.

The PT series capacitors are solvent proof. Refer to the Mini-Glossary for cleaning guidelines and recommended cleaning agents that are compatible with United Chemi-Con products.

Summary of Specifications

- Surface mount lead terminals.
- Capacitance range: 10 to $680\mu\text{F}$.
- Voltage range: 2.5 to 10VDC.
- Category temperature range: -55°C to $+105^{\circ}\text{C}$.
- Standard capacitance tolerance: $\pm 20\%$
- Nominal case size (L \times W \times H): $2.0 \times 1.25 \times 1.2\text{mm}$ to $7.3 \times 4.3 \times 3.8\text{mm}$.
- Rated lifetime: 1,000 hours at $+105^{\circ}\text{C}$.

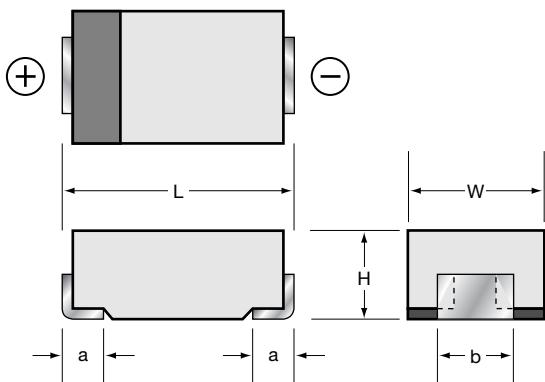

PT Specifications

Item	Characteristics																					
Category Temperature Range	−55 to +105°C																					
Rated Voltage Range	2.5 to 10VDC																					
Capacitance Range	10 to 680μF																					
Capacitance Tolerance	±20% (M) at +20°C, 120Hz																					
Leakage Current	I = 0.1CV maximum after 5 minutes at +20°C. Where I = Max. leakage current (μA), C = Nominal capacitance (μF) and V = Rated voltage (V)																					
Dissipation Factor (Tan δ)	At +20°C, 120Hz <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;">Rated Voltage (V)</td> <td style="text-align: center;">2.5-6.3</td> <td style="text-align: center;">10</td> </tr> <tr> <td style="text-align: center;">Max.
